Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 November 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

This Office Action is in response to applicant's amendment filed on 11/14/2005.

Claims 12-26 are pending in the Action.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on Nov. 28, 2005 was filed after the mailing date of the first Office Action. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 12-26 are rejected under 35 U.S.C. 102(e) as being anticipated by Casselman Steven, US patent application publication no. 2002/0156998.

As per claim 12, Casselman anticipates a method and system for communication of a plurality of virtual computers and a plurality of FPGA with a host interface very

Art Unit: 2128

identical to the claimed invention ([0006]). According to Casselman, the method includes steps

Establishing an interface between a host computer and the FPGA array (Fig. 15, [0064]-[0066]),

Transmitting configuration information over the interface in a first transmission mode to configure the FPGA array ([0066]),

Transmitting operation information over the communication interface in a second transmission mode ([0059]-[0079]).

As per claims 13 and 14, Casselman anticipates configurations for virtual devices under test in an emulation system, virtual controller or processor for emulation ([0055], [0057], [0074]).

As per claim 15, Casselman anticipates an interface between a computer host and an array of FPGA gates. This should comply the IEEE standard interface such as IEEE 1284.

As per claims 16-26, the claims are directed to a system and method for communicating a host system with an FPGA with feature limitations as shown in the rejected claims 12-15 above. Claims 16-26 are thus rejected under the same rationale as set forth.

Response to Arguments

Applicant's arguments with respect to claims 12-26 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

US patent no. 5,802,290, issued to Casselman, Steven, on Sept. 1998
